

# Heavy-Duty Engine Assembly with Turbocharger

This is a complete engine assembly with a robust design and light blue finish. It includes a turbocharger, fuel filters, and various control units, mounted on a black metal stand.

## ADDITIONAL IMAGES

## Product Overview

### Heavy-Duty Engine Assembly

This heavy-duty engine assembly is engineered as a core power conversion device, designed to transform thermal energy from fuel combustion into mechanical power. Built with a robust steel construction, this unit is tailored for demanding industrial applications, including heavy machinery and trucks. It features an integrated turbocharger system to enhance performance and efficiency, ensuring reliable power output for your operational needs.

## Physical Specifications

Net Weight	875 kg
Material	Steel

## Technical Features

### Performance Metrics

**875 kg**  
Weight

Key Components	Turbocharger, Cooling Fan, Fuel Filters, Starter Motor, Fuel Injection System
----------------	---

## Application

Primary Application	Industrial equipment, heavy-duty trucks, and high-performance machinery.
---------------------	--
