

Heavy-Duty Four Post Vehicle Lift

This four-post vehicle lift provides a stable platform for servicing buses, trucks, and other large vehicles. Featuring a robust hydraulic system and adjustable platforms, it ensures smooth operation and accommodates various vehicle sizes.

Overview

Professional Heavy-Duty Lifting Solution

This heavy-duty four-post vehicle lift is engineered for servicing large commercial vehicles, including buses and trucks. It features a robust hydraulic system and an open-front design that maximizes under-vehicle accessibility for maintenance and repair tasks. With adjustable runways and high load capacity, it provides a stable, safe, and efficient solution for professional workshops.

Technical Specifications

Lifting Capacity

30 Tons

Max Load Capacity

Key Features

Hydraulic Cylinder, Adjustable Runway, Maintenance-Free Bearings, Open Front Design, 3D Alignment Compatible

Safety & Design

Safety Systems

- Mechanical locks
- Overload protection
- Four-post stability

Design Highlights

Features an extra-wide design for 3D alignment systems and a personalized, aesthetic finish.
