

Heavy-Duty Garbage Compactor

This heavy-duty garbage compactor is designed for efficient waste management. It features robust construction and specialized wheels for optimal compaction.

Overview

Heavy-Duty Waste Management Solution

The XG6231F is a heavy-duty garbage compactor engineered for high-efficiency waste management in demanding environments. It features robust construction and specialized wheels designed for optimal compaction performance. With a powerful engine and advanced hydraulic system, this machine ensures maximum utilization of landfill space through its large integrated blade for pushing and leveling waste.
