

Heavy-Duty Gondola Railcar for Bulk Materials

This heavy-duty, open-top gondola railcar is designed for transporting bulk materials like coal, ore, and aggregates. It features robust steel construction, reinforced side walls, and standard gauge wheels for compatibility with North American railway systems.

Product Overview

Heavy-Duty Gondola Railcar

This heavy-duty open-top gondola railcar is expertly engineered for the efficient transport of high-density bulk materials, including coal, ore, and aggregates. Built with robust steel and reinforced side walls, the unit offers exceptional structural integrity and stability during transit. Designed for standard gauge tracks, it is fully compatible with North American railway systems and industrial logistics requirements.

Technical Specifications

Model Identifier	C100A
Railway Gauge	1435mm Standard Gauge
Design Features	Open-top, Reinforced sidewalls, Low center of gravity, Standard gauge
Production ID	042

Application Data

Suitable Cargo

- Coal
- Ore
- Aggregates
