

Heavy Duty Hand Shear for Sheet Metal

This hand shear is designed for cutting sheet metal with precision. It features a long handle for increased leverage and hardened steel blades for clean cuts.

Product Overview

Heavy Duty Hand Shear

This heavy-duty hand shear is engineered for precision cutting of sheet metal in professional metalworking environments. It features a long handle design to maximize leverage, ensuring clean and accurate cuts with minimal effort. Built with a sturdy base for enhanced stability, this tool is an essential addition for any workshop requiring reliable metal preparation capabilities.

Technical Specifications

Blade Material	Hardened Steel
Primary Application	Sheet Metal Cutting, Metalworking, Industrial Fabrication

Design Features

Base Stability	Sturdy Base • Stable Design
Leverage Mechanism	Yes
