Overview

Heavy-Duty Hydraulic Excavator

Engineered for demanding mining and construction applications, this heavy-duty hydraulic excavator delivers robust power and exceptional efficiency. Featuring an advanced positive flow control system and a high-strength reinforced structure, it ensures reliable performance even in extreme conditions ranging from -40°C to 50°C. With optimized fuel economy and precise micro-operation capabilities, this machine is designed to maximize productivity while lowering overall operational costs.

Performance Specifications

Rated Power

212 kW

Power

2000 rpm

Rated Speed

Operating Weight	35800 kg
Max Digging Depth	7357 mm
Standard Bucket Capacity	1.65 m ³
Ultimate Climbing Angle	35 °

Technical Details

Operating Capabilities

- Temperature range: -40°C to 50°C
- High altitude operation up to 3000m
- High dust and harsh environment resistant

Engine Model	6HK1XKSC
Emission Compliance	China Stage III, US Tier 3, EU Stage IIIA
Track Shoe Width	600 mm

Safety & Comfort

Cab Safety Standards

TOPS • FOPS

Operator Environment

- Mechanical suspension seat
- Vibration-absorbing elastic cab mounting
- Optimized visibility design
- Noise reduction technology
