

Heavy-Duty Impact Drill

This professional-grade impact drill is designed for heavy-duty applications. It features variable speed control and an auxiliary handle for controlled operation on wood, metal, and concrete.

Product Overview

Heavy-Duty Impact Drill

This professional-grade impact drill is engineered for high-performance drilling across diverse materials including steel, wood, and masonry. Featuring a robust motor with adjustable power options and variable speed control, it ensures precision and reliability in demanding work environments. The ergonomic design, complete with an auxiliary handle, provides the stability and control required for extended heavy-duty applications.

Technical Specifications

Power & Performance

850 W Max Input Power	2800 min Max No Load Speed	44800 BPM Blows Per Minute
---------------------------------	--------------------------------------	--------------------------------------

Drilling Capacity

Material	Max Capacity
Steel	13mm
Wood	25mm
Masonry	13mm

Electrical Requirements

- Voltage: 230-240V
- Frequency: 50Hz

Physical Attributes

Weight & Dimensions

3 KGS Net Weight

Packing Dimensions	34.5 x 8 x 23 cm
--------------------	------------------

Compliance

Certifications	CE
