

Heavy-Duty Impact Drill for Concrete and Metal

This impact drill is designed for heavy-duty applications. It features a robust motor for powerful drilling and impact action.

Product Overview

High-Performance Drilling Solution

This heavy-duty impact drill is engineered for demanding professional applications in both concrete and metal. It features a robust, high-performance motor designed to deliver consistent power and reliable impact action. With an ergonomic design and an auxiliary handle, it ensures user comfort and precise control during intensive tasks.

Technical Specifications

Control Features

- Variable speed control
- Auxiliary handle for stability
- Secure chuck retention

Performance Highlights

1 High

Impact Action

Design Type

Heavy-Duty • Ergonomic

Compatible Materials

Concrete, Metal, Wood
