

Heavy-Duty Impact Drill for Wood, Metal, Concrete

This impact drill is designed for heavy-duty applications. It features a robust motor for high torque and drilling speed, along with variable speed control.

Product Overview

Professional Impact Drill

This heavy-duty impact drill is designed for versatile performance across wood, metal, and concrete applications. It features a robust motor capable of high torque and variable speed control for precision work. With an ergonomic design and auxiliary handle, it ensures comfortable and controlled operation for demanding tasks.

Technical Specifications

Operating Modes

- Ordinary Hand Drill
- Impact Drill

Impact Frequency	40000 ipm
Compatible Materials	Wood, Metal, Natural Stone, Concrete
Usage Limitations	Not suitable for drilling reinforced concrete.

Features

Key Features

Variable Speed Control • Ergonomic Design • Auxiliary Handle • Heavy-Duty Motor
