

Heavy-Duty Industrial Gearbox

This heavy-duty gearbox is designed for industrial and automotive applications. It features a robust cast housing, multiple mounting points, and a splined output shaft.

Overview

Industrial-Grade Transmission Power

This heavy-duty industrial gearbox is precision-engineered for high-torque power transfer in demanding industrial and automotive environments. It features a robust, reinforced cast housing and multiple mounting points to ensure maximum stability and operational reliability. Designed for durability, the unit incorporates a specialized splined output shaft for secure connection and consistent performance under intense loads.

Technical Specifications

Core Features

- Heavy-duty industrial design
- Automotive application compatible
- Splined output shaft
- Multi-point mounting system

Housing Construction	Reinforced cast housing
