Product Overview

Heavy-Duty Marine Gearbox 06/16A

The Marine Gearbox 06/16A is a robust, heavy-duty component engineered for critical marine operations. It provides essential functions including speed reduction, ahead and astern clutching, and effective propeller thrust bearing. Designed for reliability, this unit features a compact, lightweight construction that simplifies installation without compromising performance.

Technical Specifications

Core Capabilities	Speed Reduction, Ahead Clutching, Astern Clutching, Propeller Thrust Bearing
Control Type	Mechanical
