

Heavy-Duty Industrial Refueling Machine with Pulley System

This heavy-duty refueling machine is designed for robust performance in demanding industrial environments. It features a durable construction and pulley system for efficient power transmission and optimal fluid transfer.

Product Overview

Industrial Refueling Solution

This heavy-duty refueling machine is engineered for robust performance in demanding industrial environments. It features a durable construction designed for longevity and reliable daily operation. The integrated pulley system ensures efficient power transmission, making it highly effective for various fluid transfer and refueling applications.

Technical Specifications

Construction Grade

Heavy-Duty • Industrial Grade

Primary Applications

- Fluid transfer
- Industrial refueling

Mechanical System

Pulley-driven power transmission
