

Heavy-Duty Jumper Cables for Jump Starting

These jumper cables are designed for jump-starting cars, trucks, and SUVs. They feature color-coded clamps and thick gauge wires.

Product Overview

Heavy-Duty Performance

These heavy-duty jumper cables are engineered for optimal conductivity and reliable performance when jump-starting vehicles. Featuring thick-gauge wiring, they ensure efficient power transfer to revive dead batteries quickly. The design includes color-coded clamps for safe, secure, and easy connections, making them an essential tool for cars, trucks, and SUVs.

Technical Specifications

Vehicle Compatibility

- Cars
- Trucks
- SUVs

Clamp Identification

Connection Type	Color Code
Positive	Red
Negative	Black

Safety Features

Color-coded clamps, Thick-gauge wire
