

# Heavy Duty Lever Hoist

This lever hoist features a quick adjust hook position and good braking performance. Its compact design allows for use in confined spaces.

## Product Overview

### Professional Lifting Solution

This heavy-duty lever hoist is engineered for demanding lifting and pulling applications across construction, industrial, and automotive sectors. Featuring an innovative, compact design, it allows for precise control and efficient operation, even in confined workspaces. Built with high-strength materials, it ensures durability and reliable performance for your most challenging tasks.

## Performance Specifications

### Rated Capacity

**0.75 Ton**

Lifting Capacity

### Key Features

- Quick adjust hook position
- High-efficiency braking system
- Compact design for confined spaces
- Lever-operated precision control

## Design & Build

### Build Quality

Heavy Duty • High-Strength Materials

### Applications

Construction, Industrial, Automotive
