

Heavy-Duty Liquid Spraying System

This heavy-duty spraying machinery is designed for efficient and precise application of various liquids. The unit features a high-capacity tank, a powerful pump, and a versatile spray boom system, allowing for adjustable spray patterns and coverage areas.

Overview

High-Efficiency Spraying Solution

This heavy-duty liquid spraying system is engineered for precise and reliable application of liquids across challenging environments. It features a robust, stable chassis with all-terrain mobility and hydraulic support for maximum operational safety. Designed for versatility, the system includes a high-capacity tank and an adjustable boom, making it a critical asset for large-scale construction, agriculture, and infrastructure projects.

Technical Specifications

System Capabilities

- All-terrain tire configuration
- Hydraulic outrigger stabilization
- Adjustable spray boom system
- High-capacity liquid reservoir

Recommended Applications

Construction, Agriculture, Infrastructure Projects
