

Heavy Duty Loader Wheel Rims

These heavy-duty wheel rims are designed for construction and mining loaders. They feature a robust construction to withstand heavy loads and ensure optimal performance.

Product Overview

Engineered for Extreme Conditions

These heavy-duty wheel rims are specifically designed for high-stakes construction and mining loader applications. Built with robust steel construction, they are engineered to withstand extreme loads and harsh operating environments while ensuring long-term reliability. Precision-machined for secure tire fitment, these rims provide optimal balance and performance across a variety of demanding earth-moving tasks.

Technical Details

Material	Robust Steel
Surface Coating	Corrosion-resistant protective finish (Yellow)
Compatibility Features	Construction Loaders, Mining Loaders, Earth Moving Equipment

Performance Metrics

Key Performance Metrics

1 Grade High Load Capacity	100 % Corrosion Resistance
--------------------------------------	--------------------------------------

Design Advantages

- Precision-machined for proper fit and balance
- High visibility yellow coating
- Extended service life in harsh environments
- Secure mounting with multiple bolt holes
