

Heavy-Duty Motor Grader for Road Construction

This heavy-duty motor grader is designed for road construction, maintenance, and earthmoving applications. It features a powerful engine, hydraulic controls, and a moldboard for precise grading and leveling.

Overview

Heavy-Duty Performance for Infrastructure

This heavy-duty motor grader is engineered specifically for demanding road construction, maintenance, and earthmoving applications. It features a powerful engine paired with intuitive hydraulic controls and a precision moldboard for accurate leveling. Designed for versatility, it includes all-wheel drive to ensure superior traction and maneuverability across challenging terrains, while the enclosed cab prioritizes operator comfort and safety.

Performance

Drive System	All-wheel drive
Primary Applications	Road Construction, Road Maintenance, Earthmoving

Features

Operator Environment

Enclosed Cab • Safety Focused • Comfort Optimized

Key Components

- High-power engine
- Precision moldboard
- Hydraulic control unit
- Enclosed operator cabin

Control System	Hydraulic controls
