

Heavy-Duty Polyurethane Swivel Caster

This heavy-duty swivel caster has a durable polyurethane wheel with a double-wheel design for enhanced load distribution and smooth rolling. Constructed with a robust steel frame and mounting plate, it provides stability and longevity in demanding industrial environments.

Product Overview

Industrial Performance and Reliability

This heavy-duty polyurethane swivel caster is engineered for demanding industrial environments where durability and smooth maneuverability are essential. Featuring a robust double-wheel design, it offers superior load distribution, making it an ideal choice for heavy carts and equipment. The assembly includes a high-strength steel frame and mounting plate to ensure long-term stability and operational reliability under intense use.

Technical Specifications

Common Applications

- Industrial carts
- Mobile equipment
- Material handling systems

Wheel Material	Polyurethane
Caster Type	Swivel
Frame Material	Steel
Design Features	Double-wheel design, Swivel mechanism, Heavy-duty construction
