Overview

Reliable Power Generation

This heavy-duty power generation plant is engineered for consistent and efficient performance in demanding environments. Featuring a robust, super-silent enclosure, it provides excellent protection from the elements while minimizing noise output. The unit is designed for stability and ease of installation, making it an ideal solution for industrial, commercial, and emergency backup power applications.

Technical Specifications

Noise Level

Super Silent

Model Identifier

CD17

Frequency

50 Hz

Certifications

Compliance Standards

CE, ISO 9001

Features

Key Features

- Robust weather-resistant enclosure
- Integrated control panel with digital displays
- Heavy-duty base for vibration dampening
- Emergency stop button for safety
- Optimized ventilation system
