

Heavy Duty Rigger Skates for Equipment Moving

These heavy-duty rigger skates are designed for moving heavy equipment and machinery. They provide stability and maneuverability in tight spaces due to their robust construction and rotating top.

Product Overview

Industrial-Grade Equipment Moving

These heavy-duty rigger skates are specifically engineered for the safe transport of high-capacity equipment and machinery. Constructed using advanced materials with reinforced thickening technology, they are built to support significant loads without structural failure. Their design incorporates a rotating top to ensure superior maneuverability and stability, making them an essential tool for efficient industrial material handling.
