Product Overview

Heavy-Duty Rock Drilling Grab

This heavy-duty rock drilling grab is engineered for demanding piling and excavation projects. Constructed with high-strength materials, it ensures durability and reliable performance in harsh construction environments. Its specialized design facilitates efficient material handling, grabbing, and lifting, making it an essential component for professional rock drilling and foundation machinery.

Application & Features

Primary Applications

Rock Drilling, Piling, Foundation Engineering, Heavy Construction, Excavation

Technical Specifications

Diameter (mm)			Length (mm)			Weight (kg)		
530	590	640	3500	3500	3500	2400	2350	2460
530	590	640	3500	3500	3500	2400	2350	2460
