

Heavy Duty Roller Dollies

These load dollies or skates allow for easy rolling and steering with minimal effort. They are designed to help move items that require less pushing and pulling.

Product Overview

Heavy Duty Moving Solution

These heavy-duty roller dollies, also known as moving skates or skids, are engineered for the safe and efficient transport of bulky industrial equipment. Featuring a low-profile design that keeps loads close to the ground, they ensure stability during transit. Built with all-steel components that are either powder-coated or galvanized, these dollies offer superior corrosion resistance and long-term durability for demanding industrial environments.

Technical Specifications

Service Life

5 years

Expected Lifespan

Key Features

- Low-profile design for stability
- Corrosion-resistant finish
- Easy maneuverability
- Heavy-duty load capacity

Construction Materials

Steel, Powder Coated, Galvanized

Applications

Common Applications

Industrial Areas • Heavy Equipment Handling • Machinery Moving
