

Heavy Duty Roller Skid for Equipment Moving

This heavy-duty roller skid is designed for moving heavy equipment and machinery. It features a robust steel frame with integrated rollers, a swivel mechanism, and side handles for easy positioning.

Product Overview

Industrial Equipment Moving Solution

This heavy-duty roller skid is designed for the efficient movement of machinery without the need for electricity or oil. Engineered for clean environments, it operates silently and produces no waste gas, making it ideal for indoor workshops and sensitive workspaces. The unit utilizes advanced materials and thickening technology to support hundreds of tons, ensuring reliability during heavy-duty operations.

Technical Specifications

Load Capacity Class

100 tons

Capacity Potential

Key Features

Silent Operation, Zero Emission, Heavy-Duty Steel Construction, Swivel Top Plate, Rubber Load Pad

Maintenance and Support

After-Sales Support

- Professional technical troubleshooting assistance
- After-sales service support

Maintenance

Keep the unit clean and dry after use to maintain structural integrity and performance.
