

Heavy-Duty Rotary Hammer

This heavy-duty rotary hammer is designed for drilling and demolition in concrete, masonry, and similar hard materials. It features a high-impact drilling mechanism, variable speed control, and a safety clutch.

Product Overview

Professional Performance

This heavy-duty rotary hammer is engineered for demanding drilling and demolition tasks in concrete and masonry. Featuring a robust 1100W motor and a variable impact energy range of 1.5-7.5J, it offers the versatility required for professional construction, renovation, and maintenance work. The integrated safety clutch and ergonomic design ensure high-performance operation while maintaining user comfort and protection.

Technical Specifications

Impact Energy

1.5 J Min Energy	7.5 J Max Energy
----------------------------	----------------------------

Power Input	1100 W
Rated Current	8.5 A
Impact Rate	2800 /min
Operating Frequency	60 Hz

Compatibility & Features

Core Features

- Variable speed control
- Safety clutch for user protection
- High-impact drilling mechanism
- Ergonomic construction

Compatible Tooling	SDS-plus drill bits, SDS-plus chisels
--------------------	---------------------------------------
