

# Heavy-Duty Rotary Hammer Drill

This professional rotary hammer is engineered for heavy-duty drilling and demolition. It features variable speed control and multiple operating modes for versatile use.

## Product Overview

### High-Performance Rotary Hammer

This professional-grade rotary hammer is engineered for demanding drilling and demolition applications in industrial and construction environments. Powered by an 1100W motor, it delivers the necessary torque for heavy-duty tasks while maintaining precise operational control. Its robust design is optimized for efficiency, reliability, and sustained performance on the job site.

## Technical Specifications

### Rated Power

**1100 W**

Power Input

### Rotation Speed

850 RPM

## Key Features

### Safety & Comfort

- Ergonomic handle design
- Integrated anti-vibration system
- Variable speed control

### Ideal Applications

Construction, Renovation, Industrial Use, Demolition
