

Heavy-Duty Rotary Hammer Drill with Water Feed

This heavy-duty rotary hammer drill is designed for demanding construction and demolition tasks. It incorporates a water feed system with a reservoir, enabling wet drilling for dust suppression and improved drilling efficiency in materials like concrete and masonry.

Product Overview

Professional Performance

This heavy-duty rotary hammer drill is engineered for demanding construction and demolition tasks. Featuring an integrated water feed system, it allows for efficient wet drilling, which significantly suppresses dust and enhances performance when working with concrete and masonry. Designed for professional use, the tool combines robust construction with ergonomic controls for reliable operation in challenging job site environments.

Technical Specifications

Power Source	Electric
Key Features	Water Feed System, Dust Suppression, Lock-on Button, Side Handle

Design & Ergonomics

Control Features

- Side handle for stability
- Trigger switch
- Lock-on button for continuous operation

Grip Type	Pistol Grip
-----------	-------------

Application

Suitable Materials

Concrete • Masonry
