

Heavy-Duty Rotating Top Cargo Trolley

This heavy-duty cargo trolley is designed for moving heavy loads. It features a robust steel construction with a rotating top plate and smooth-rolling wheels for efficient transport.

Product Overview

Heavy-Duty Cargo Movement Solution

This rotating top cargo trolley is designed to streamline heavy-duty material handling operations in warehouses, logistics centers, and industrial environments. By facilitating efficient loading, unloading, and short-distance transport, it significantly reduces labor intensity and operational costs while improving safety. Its robust construction ensures cargo integrity, making it an essential tool for optimizing storage space and accelerating vehicle turnover.

Performance Data

Model Specifications

Model	Wheels	Capacity (kg)	Test Load (kg)	Net Weight (kg)
TQ-6	4	6000	12000	12
TQ-8	6	8000	16000	17
TQ-12	8	12000	24000	22
TQ-15	9	15000	15000	22.6
TQ-18	12	18000	36000	30
TQ-24	16	24000	24000	37

Key Features

Design Highlights

- Rotating top plate for flexible positioning
- Robust steel construction for durability
- Smooth-rolling wheels for efficient transport
- Compact design suitable for confined spaces

Ideal Applications

Warehousing, Logistics, Loading Docks, Agricultural Settings, Industrial Manufacturing
