

Heavy-Duty Sealant Applicator Gun

This caulking gun is designed for applying sealants and adhesives with precision. It features a durable metal frame and an ergonomic handle for comfortable use.

Product Overview

Professional Sealant Application

This heavy-duty sealant applicator gun is engineered for precision and reliability in professional construction and repair environments. Featuring a 12:1 thrust ratio and a durable aluminum alloy handle, it ensures smooth, consistent bead application for various sealants and adhesives. Designed with ergonomic features like a ladder hook and rotating barrel, this tool is built to minimize user fatigue and maximize efficiency during extended projects.

Technical Specifications

Thrust Ratio

12 :1

Thrust Ratio
