

Heavy-Duty Semi-Trailer for Oversized Loads

This semi-trailer is designed for hauling oversized and heavy loads. It features a robust steel frame, multiple axles, and a low-profile deck for efficient loading.

Overview

Heavy-Duty Transport Solution

The WS9450 semi-trailer is a robust transport solution engineered specifically for hauling oversized and heavy industrial loads. Featuring a reinforced steel frame and a low-profile deck, it facilitates efficient loading of construction equipment and heavy machinery. The integration of advanced suspension and high-performance braking systems ensures operational safety and reliability under demanding transport conditions.

Technical Specifications

Primary Applications

- Construction equipment
- Industrial machinery
- Oversized industrial goods

Key Features

Heavy-duty steel frame, Low-profile deck, Multi-axle design, Enhanced braking system

Compliance

Model Identifier

168221 IE
