

Heavy-Duty Sheet Metal Snips

These tin snips are designed for cutting sheet metal with precision. They feature high-leverage handles and durable steel blades, making them suitable for HVAC, roofing, and metalworking.

Product Overview

Professional Grade Metal Cutting

These heavy-duty sheet metal snips are engineered for professional use in HVAC, roofing, and general metalworking environments. Designed to provide clean, precise cuts with minimal physical exertion, the tool ensures high performance across diverse sheet metal applications. The combination of durable steel blades and a leverage-focused handle design makes this an essential addition to any trade professional's toolkit.

Key Features

Key Advantages

- High-leverage handle design
- Durable steel blade construction
- Ergonomic handle grips
- Designed for HVAC and roofing applications
