

Heavy-Duty Single Sheave Pulley with Hook

This heavy-duty single sheave pulley is designed for lifting and rigging applications. Constructed with durable materials, it ensures reliable performance and an extended lifespan.

Product Overview

Versatile Industrial Lifting Solution

The HS series chain block is a professional lifting device designed for manual operation, making it ideal for environments where electric power is unavailable. It excels in diverse settings including factories, construction sites, and warehouses, offering high efficiency with minimal manual effort. Built for durability and safety, its robust design ensures reliable performance during loading and unloading tasks.

Key Features

Operational Advantages

Manual Operation, Durable Construction, High Efficiency, Lightweight Design, Easy Maintenance

Performance Metrics

Efficiency Indicators

0.5 t

Starting Capacity

20 t

Max Capacity

2.5 m

Standard Lift Height

Technical Specifications

Performance Data

Capacity (t)	Headroom (mm)	Load Chain Falls	Net Weight (kg)
0.5	270	1	9.5
1	270	1	10
2	444	2	14
5	616	2	36
20	1000	8	155
