

# Heavy Duty Sledge Hammer

This sledge hammer is designed for demolition, driving stakes, and heavy hammering applications. The tool features a forged steel head for maximum impact force and a shock-absorbing handle for comfortable use.

## ADDITIONAL IMAGES

## Product Overview

### Professional Heavy-Duty Sledge Hammer

This heavy-duty sledge hammer is engineered for high-impact tasks, including demolition, driving stakes, and general heavy hammering. Constructed with a forged, hardened carbon steel head, it delivers maximum striking force and long-lasting durability. The tool features an ergonomically designed, shock-absorbing handle to improve grip security and significantly reduce user fatigue during extended construction or landscaping projects.

## Technical Specifications

Head Weight	0.9 KG
Handle Length	300 MM
Head Material	Carbon Steel

## Features

### Ergonomic Features

Shock-absorbing grip • Reduced fatigue • High-impact forged steel

### Suitable Applications

Demolition, Driving Stakes, Construction, Landscaping
