Product Overview

Industrial-Grade Sliding Gate Solutions

This heavy-duty sliding gate wheel is engineered for high-performance track facilities, offering robust support for loads ranging from 300kg to 1000kg. Equipped with precision-engineered single or double ball bearings, it ensures smooth, effortless movement even under heavy industrial use. The wheel is designed for versatility and durability, featuring various groove profiles to suit different track systems and a protective finish for corrosion resistance.

Technical Specifications

Load Capacity Range

300 kg

Minimum Load

1000 kg

Maximum Load

Bearing Configurations

- Single ball bearing
- Double ball bearing

Available Groove Profiles

V-Groove, U-Groove, Y-Groove

Steel Strength Grade

8.8

Applications

Suitable Applications

Sliding Gates • Industrial Doors • Track Facilities • Commercial Access
