

Heavy-Duty Split Leather Welding Gloves

These welding gloves are constructed from premium split leather for enhanced durability. They feature reinforced palms and fingers, providing excellent heat resistance and abrasion protection for welding and metalworking.

Product Overview

Heavy-Duty Protection

These heavy-duty welding gloves are engineered for superior protection and durability in demanding industrial environments. Constructed from premium split leather, they feature reinforced palms and fingers to provide enhanced heat resistance and abrasion protection. Designed for welding and metalworking, these gloves balance safety with necessary dexterity for high-heat applications.

Technical Standards

Safety Certifications

CE, EN 12477:2001, EN 420:2003, TYPE A

Material & Design

Construction Materials

- Premium split leather
- Reinforced palms
- Reinforced fingers

Key Design Features

Heat resistant • Abrasion resistant • Enhanced grip • High dexterity
