

Heavy Duty Stainless Steel Pipe Coupling

This heavy-duty A-type pipe coupling is designed for robust and secure pipe connections. It is constructed from high-quality stainless steel and meets ASTM A888/CISPI301 standards.

Product Overview

Robust Pipe Joining Solution

This heavy-duty A-type pipe coupling is engineered for secure and reliable pipe connections in demanding industrial environments. Constructed from high-quality stainless steel, the design incorporates multiple bands to deliver enhanced clamping force and superior leak prevention. It serves as an ideal solution for applications requiring long-term durability and consistent performance.

Technical Specifications

Suitability

Industrial • Heavy-duty applications

Material	Stainless Steel
Coupling Type	A-Type
Key Features	Heavy-duty, Multiple bands, Leak prevention, Enhanced clamping force
