Product Overview

Professional Vehicle Maintenance Solution

This heavy-duty steel car ramp is engineered for professional vehicle maintenance and repair tasks. Constructed with a sturdy, welded steel frame, it provides a secure and elevated platform for accessing the undercarriage of cars and light trucks. Its design incorporates multiple support beams to ensure optimal load distribution, making it an ideal tool for oil changes, inspections, and routine automotive servicing.

Technical Specifications

Available Models

- MG18-01
- MG18-02
- MG18-019

Certifications

CE

Construction Material

Heavy-duty steel

Safety Features

Non-slip surface, Welded construction, Multiple support beams

Usage

Recommended Applications

- Oil changes
- Undercarriage inspections
- General automotive repair
