

# Heavy Duty Steel Crowbar

This crowbar is forged from carbon steel or railway steel. It is heat-treated and features a painted surface.

## ADDITIONAL IMAGES

## Product Overview

### Professional Grade Demolition Tool

This heavy-duty crowbar is engineered for demanding construction, demolition, and maintenance tasks. Constructed from high-quality hardened steel, it features a dual-end design with a flat, wide blade for prying and a pointed tip for precise leverage and material removal. Its robust build ensures reliable performance and longevity in professional environments.

## Technical Specifications

Material	Hardened Steel
Finish	Black Finish
Key Features	Flat Wide Blade, Pointed Tip, High Leverage, Chisel End

## Applications

### Primary Applications

- Construction
- Demolition
- Maintenance
- Nail Removal
- Prying Wood

## Market Availability

### Export Markets

North America • Europe • South America • Middle East
