

Heavy-Duty Steel Roll Cage Trolley

This heavy-duty roll cage trolley is designed for efficient transportation and storage of goods. Constructed from robust steel, it features a secure cage design and smooth-rolling casters for easy maneuverability.

Product Overview

Professional Material Handling Solution

This heavy-duty steel roll cage trolley is engineered for high-efficiency transportation and secure storage in demanding environments like warehouses and distribution centers. Its robust steel construction ensures long-term durability, while the integrated cage design provides maximum security for goods during transit. The collapsible frame allows for significant space savings when not in use, making it an ideal choice for optimizing facility floor space.

Technical Details

Model Number	TC4625
Material	Heavy-duty steel
Design Features	Collapsible, Roll cage design, Secure containment

Operational Performance

Industries Served

- Logistics
- Manufacturing
- Retail
- Warehousing

Maneuverability	Equipped with smooth-rolling casters for easy transport when fully loaded
