

# Heavy-Duty Steel Truck Wheel Rim

This heavy-duty steel rim is engineered for trucks and industrial vehicles. Its multi-hole pattern ensures secure mounting and balanced weight distribution.

## Product Overview

### Industrial Strength Engineering

This heavy-duty steel wheel rim is engineered specifically for trucks and demanding industrial vehicles. Its high-strength construction ensures exceptional durability and resistance to deformation when operating under extreme loads. Finished with a protective black coating, it provides reliable corrosion resistance for long-term service in various engineering contracting environments.

## Technical Specifications

### Surface Finish

Black finish • Corrosion-resistant

### Material Type

High-strength steel

## Design Features

### Key Performance Attributes

- Load-bearing durability
- Balanced weight distribution
- Deformation resistance

### Mounting Pattern

Multi-hole configuration

## Application Suitability

### Suitable Applications

Trucks, Industrial Vehicles, Engineering Contracting
