

Heavy Duty Steel Welding Hinge

These heavy-duty welding hinges are made from durable steel. They are designed for welding directly onto metal frames and gates to provide a strong and reliable pivot point.

Product Overview

Robust Industrial Welding Hinges

These heavy-duty steel welding hinges are engineered for demanding gate and door applications where maximum durability is required. The robust barrel design ensures consistent, smooth operation and provides a reliable pivot point for heavy metal structures. Designed for direct welding, they offer a secure installation suitable for a wide range of industrial, commercial, and residential projects.

Technical Specifications

Material	Steel
Design	Barrel design
Installation	Welding

Application Suitability

Applications	Industrial, Commercial, Residential, Metal Gates, Metal Doors
