

Heavy-Duty Steering Drag Link

This heavy-duty steering drag link is a crucial component in a vehicle's steering system. Constructed from robust steel with a black coating, it offers corrosion resistance and reliable steering performance.

Product Overview

Robust Steering Performance

This heavy-duty steering drag link is engineered as a vital component for vehicle steering systems, built to endure rigorous driving conditions. Constructed from high-strength steel and finished with a black anti-corrosion coating, it offers superior durability and long-term reliability. Its design includes precision-engineered ball joint ends and a central mounting point, ensuring a secure and responsive connection to the steering idler arm.

Technical Details

Key Features

- Corrosion-resistant finish
- Integrated ball joint ends
- Threaded studs
- Castle nuts included
- Central steering idler arm mount

Material	Robust Steel
----------	--------------

Surface Coating	Black Paint
