

Heavy-Duty Tanker Truck

This is a heavy-duty truck with a large tank trailer, designed for transporting liquids or bulk materials. The truck is equipped with multiple axles for increased load capacity and stability.

Product Overview

Heavy-Duty Tanker Truck Solution

This heavy-duty tanker truck is engineered for the efficient transport of bulk liquids and industrial materials. Featuring a robust red high-roof cab, the vehicle combines aerodynamic design with high-capacity engineering for long-haul operations. Its multi-axle configuration ensures superior load stability and road performance, making it a reliable choice for demanding logistical requirements.

Technical Specifications

Design Features

- Red high-roof cabin
- Cylindrical gray tanker body
- Reinforced multi-axle system
- High-visibility side markings

Vehicle Configuration

Heavy-Duty, Multi-Axle, Tanker Trailer, Aerodynamic Cab

Usage

Primary Use Cases

Liquid Transport • Bulk Material Hauling • Long-Distance Logistics
