

Heavy-Duty Top and Bottom Feed Lockstitch Sewing Machine

This single needle flatbed lockstitch sewing machine is designed for heavy-duty applications. It features top and bottom feed mechanisms, ensuring consistent and even feeding of materials.

Product Overview

Industrial Heavy-Duty Capability

This single-needle flatbed lockstitch sewing machine is engineered specifically for demanding industrial applications involving thick fabrics and multi-layer materials. By utilizing a sophisticated top and bottom feed mechanism, it ensures consistent material movement and precise stitch formation. Its robust construction delivers the durability and reliability required for professional manufacturing environments.

Technical Specifications

Machine Class	Single needle flatbed lockstitch
Feed Type	Top Feed, Bottom Feed

Performance Metrics

Material Handling

- Heavy-duty materials
- Thick fabrics
- Multi-layer sewing

Safety and Compliance

Operational Safety

Read safety manual • Caution required • Industrial use
