Product Overview

Professional Heavy-Duty Tower Crane

This high-capacity tower crane is expertly engineered for demanding construction environments, offering superior stability and precision for heavy material handling. Designed for versatility, it supports extensive coverage for high-rise building projects, industrial facilities, and large-scale infrastructure developments. The crane integrates advanced control systems to ensure smooth operation, high efficiency, and enhanced safety for complex lifting tasks.

Operational Capabilities

Key Performance Indicators

20 ton
Max Load

5 ton
Tip Load

Design and Build

Key Features	Robust Lattice Boom, Advanced Control Systems, Spacious Operator Cabin, Heavy-Duty Structural Design
Accessibility	Yes
