

Heavy-Duty Tricycle

This tricycle is built for heavy-duty applications. Its robust design ensures stability and longevity.

Overview

Industrial Mobility Solution

This heavy-duty tricycle is engineered for demanding commercial and industrial environments, offering a robust platform for moving goods across warehouses or facilities. Designed with a focus on stability and ease of operation, it helps streamline internal logistics and inventory management. Its durable construction ensures reliable performance under consistent usage, making it an ideal choice for businesses seeking an efficient, pedal-powered transport solution.

Key Features

Construction Highlights

Heavy-duty frame, Industrial grade, Corrosion resistant

Performance

Operational Specs

3 wheels

Wheel Configuration

Applications

Primary Use Cases

- Warehouse cargo transport
- Industrial site mobility
- Logistics and fulfillment centers
