Product Overview

High-Efficiency Heavy-Duty Filtration

This heavy-duty truck air filter is engineered with premium quality filter paper to ensure superior engine protection and longevity. Designed for demanding applications, it effectively captures dust, pollen, and airborne contaminants to maintain optimal airflow and combustion efficiency. The robust construction and integrated wire mesh support prevent deformation under high-pressure conditions, providing a reliable and secure leak-free fit for your commercial fleet.

Technical Specifications

Filter Geometry	Cylindrical
Construction Materials	High-quality filter paper, Metal casing, Wire mesh support

Key Features

Performance Advantages

- Maximum filtration efficiency
- Extended service life
- Maintains structural integrity under high airflow
- Easy installation and replacement
- Reduced maintenance downtime

Compliance and Quality

Heavy-Duty Grade • Leak-Free Seal
