

Heavy-Duty Truck and Bus Tire

This tire is specifically designed for trucks and buses. It features a robust tread pattern that provides enhanced traction and durability.

Product Overview

Rugged Performance for On and Off-Highway Use

The RS601A is a heavy-duty tire specifically engineered for both truck and bus applications. Its robust all-position tread pattern provides superior traction across diverse terrain, while the reinforced structural design supports heavy load requirements. Built for durability and reliability, this tire is an ideal solution for demanding logistics and transport operations.

Performance Features

Tread Depth Highlights

17.5 mm

Max Tread Depth

Product Advantages

All-position tread, Reinforced structure, High load capacity, On and off-highway versatile
