

Heavy-Duty Truck and Bus Tire Changer

This heavy-duty tire changer is designed for servicing tires on trucks and buses. It features powerful clamping jaws and a bead breaker for efficient tire removal and installation.

Product Overview

Professional Tire Service Solution

This heavy-duty tire changer is engineered specifically for the demanding requirements of truck and bus tire maintenance. Built with a robust structure, it provides the stability and power needed to manage large-format tires with ease. The unit integrates a precision bead breaker and high-strength clamping jaws to ensure safe and efficient tire processing in professional workshop environments.

Technical Specifications

Model Identifier	SK368
Target Vehicles	Trucks, Buses

Key Features

Performance Features

- Robust heavy-duty frame construction
- High-capacity clamping jaws
- Integrated powerful bead breaker system
- Precision-controlled operation
- Advanced operator safety protocols
