

Heavy-Duty Truck Rear Axle Assembly with Brakes

This is a heavy-duty truck rear axle assembly designed for demanding applications. It features integrated brake drums, air brake chambers, and a central differential housing.

Overview

Heavy-Duty Rear Axle Assembly

This heavy-duty truck rear axle assembly is engineered for demanding commercial vehicle applications, offering robust construction and long-term reliability. The unit comes fully equipped with integrated brake drums and air brake chambers, ensuring optimal stopping power and safety. Designed for high-performance environments, this assembly features a central differential housing that ensures efficient power distribution under load.

Technical Specifications

Application

Heavy-Duty • Commercial Vehicle

Key Components

Integrated Brake Drums, Air Brake Chambers, Central Differential Housing

Build Quality

Robust construction designed for demanding operational environments
