Product Overview

Heavy-Duty Performance

This heavy-duty MC rear axle is engineered for robust performance and durability in demanding commercial automotive applications. It features a reinforced differential housing and precision-engineered gears designed for optimal power transfer and increased load-bearing capacity. Built to ensure reliable operation and extended service life, this axle is an ideal solution for trucks, buses, and other heavy-duty vehicles.

Technical Specifications

Key Components

- Reinforced differential housing
- Precision-engineered gears
- Heavy-duty axle shafts
- Advanced braking system mounts

Braking System

Drum brakes

Application

Suspension Setup

Versatile Compatibility

Compatible Applications

Trucks, Buses, Heavy Vehicles
